Everyone asks 'what ones'. I know we have not yet released list or conc, so at least describe in terms of short chain and long chain and concentrations (the only real 'comparator' there is the Hlth Advisory level for PFOA (e.g., ppb on containers compared to ppt "safe" health effect levels in DW)

Thoughts on including the information on PFAS Species & amounts in the slides? Is that something Avi would want? I know Michal requested that for her briefing; not sure of Avi's background & role.

Importance: High

OPP – I need a few slides on the PFAS in Containers issue to insert into the broader Deck with OPPT Actions; also, will Ed or Kim present on those? If you can give me slides Monday (thinking to put info from your “1-pager” into slide format), I will turn back around to you also on Monday to see how it will look
